

# The Dairy Margin Protection Program: Information and Opportunities

- What is the DMPP and how will it work?
- Dairy Decision Tool Software Demo
- Dairy Cost of Production and tools for calculating your costs and margin.
- Should our farm participate in this program? Potential impacts on profitability

The 2014 Farm Bill initiated a new dairy risk management program that is expected to assist with price risk management when the MILC and price support programs expire this fall.

All dairy farmers will need to make a decision whether to participate or not. If a farm chooses to participate, they will also have to indicate a level of participation.

Join us at one of three regional meetings to learn more about the Dairy Margin Protection Program and what it means for your business.

Follow-up meetings will be held to review risk-management alternatives and provide training in the use of the Dairy Decision Software Tools.
