

Retailer Responses to Consumer Perceptions about Food

Annual National Workshop for Dairy Economists and Policy Analysts: May 3, 2016

Bill Drake
 Food Industry Management Program
 Dyson School of Applied Economics and Management
 Cornell University

The Food Industry has LOTS of ISSUES!!

- Obesity
- Gluten free
- Allergies
- Organic/Biodynamic
- GMOs
- Hormones
- Natural
- Local
- Sustainability
- antibiotics
- Animal rights
- Human rights
- Immigration
- Fair Trade
- Food Deserts
- Food Waste
- Vegetarian/Vegan
- Food safety
- Food security “A”
- Food security “B”

A partial list, in no particular order

SOCIETAL CONTEXT

- Pervasive internet and social media usage (receiving and sending)
- Multi-media coverage of food and food industry
- Rising awareness of food related issues
- Rising concern about food sources & practices
- Levels of awareness and concern higher than level of understanding of issues
- Information and misinformation abound
- Confusion conflates issues for many consumers
- Aging Baby Boomers and rising Millennials
- Stagnation and polarization of household income

FOOD AS DESIGNER DRUG?

$$\left(\frac{\text{Salt} + \text{Fat}^2}{\text{Satisfying Crunch}} \right) \times \text{Pleasing Mouth Feel} = \text{A Food Designed to Addict}$$

FOOD JUSTICE: KNOW THE ISSUES

Pasteurized, homogenized, organic, hormone-free: What's up with your milk?
By Sarah L. Daniels on Apr 24, 2016 18 comments
Crossposted from Food52

FOOD IS POWER

Food Empowerment Project seeks to create a more just and sustainable world by recognizing the power of one's food choices. We encourage choices that reflect a more compassionate society by spotlighting the abuse of animals on farms, the depletion of natural resources, unfair working conditions for produce workers, the unavailability of healthy foods in communities of color and low-income areas, and the importance of not purchasing chocolate that comes from the worst forms of child labor.

Make it with Buttermilk

We recently added a new product at Rowdy Cow Creamery... buttermilk. This old fashion product is made with two simple ingredients, whole milk and culture.

Some people grow up drinking buttermilk and using it in the kitchen. Others have never experienced buttermilk. So I put together a few fun recipes ideas for using buttermilk. Once you use buttermilk in your bread and pancake recipes or use it to marinate chicken, you'll never go back! It's delicious.

Ideas for using Buttermilk

For creamy, tangy goodness add buttermilk to both savory and sweet recipes.

- Bake with it including biscuits, cakes, muffins, breads, and buttermilk pie.

Our family dairy farm is located in northeast Ohio

MAJOR ENVIRONMENTAL ISSUES AND ORGANIZATIONS

- Sustainability
- Pesticides, herbicides
- Hormones, antibiotics
- GMOs
- Air quality
- Water quality
- Fisheries viability
- Food Waste

MAJOR HUMAN RIGHTS CONCERNS & ORGANIZATIONS

- Livable wages
- Child labor
- Slave labor
- Working conditions
- Immigration reform

MAJOR ANIMAL RIGHTS ISSUES & ORGANIZATIONS

- Gestation crates for pigs
- Battery cages for chickens
- “Factory farms”
- Antibiotics
- Hormones
- Testing

What is natural? First wave of comments are in (and hint at the challenge facing the FDA)

By Elaine Watson+, 01-Dec-2015

“...grown without pesticides, herbicides, chemical fertilizers, growth hormones, and above all GMOs.”

“...natural should only refer to the ingredients, not the way the product is processed....”

“Food made by God is natural. Food made by a chemical company in the lab is not natural.”

“If the human food product comes in a box or packet and any of the ingredients have been processed, the term “natural” should never be allowed.”

“...It provides a halo for food producers without providing any actual protection or valuable information to consumers. To this extent, it is often downright misleading...”

What's better? Organic or Non-GMO?

Organic vs. Non-GMO Food Makers Take Off

By JACOB BUNGE AND ANNIE GASPARRO

Natural-foods makers have spent years going after the industry establishment. Now, they are taking on each other. Surging sales of foods marketed as made without genetically modified crops are outpacing sales of food labeled organic in U.S. grocery stores. That is frustrating some organic companies and farmers, who invest significant sums to meet government organic standards and to get their foods certified.

The organic industry is responding with marketing campaigns touting the benefits of organic food in addition to the fact that it is without genetic engineering.

“Organic is non-GMO,” said

Campbell to label GMO ingredients, supports GMO disclosure legislation

Confusion!

HALF OF THOSE POLLED BELIEVE IT IS EASIER TO DO THEIR TAXES

THAN TO FIGURE OUT HOW TO EAT HEALTHFULLY

THE BREAKDOWN:

52%*
OF THOSE POLLED

Think it is harder to figure out what you should and shouldn't eat to be healthier.

VS.

48%
OF THOSE POLLED

Think it is harder to figure out how to do your own taxes.

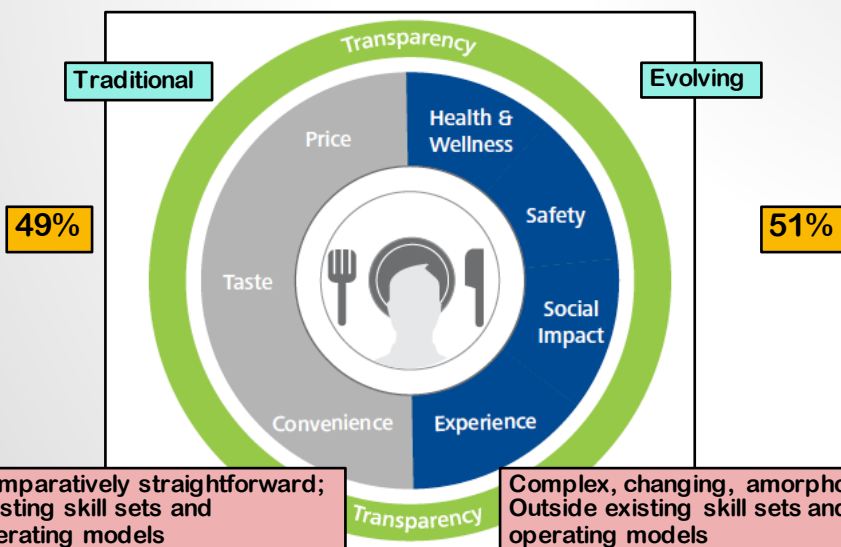

Those most in need of learning how to eat healthfully, those with high BMI, heart disease or cholesterol issues, or high blood pressure - ARE MORE APT TO FIND IT DIFFICULT.

GROUPS MORE LIKELY TO SAY FIGURING OUT WHAT TO EAT IS HARDER:

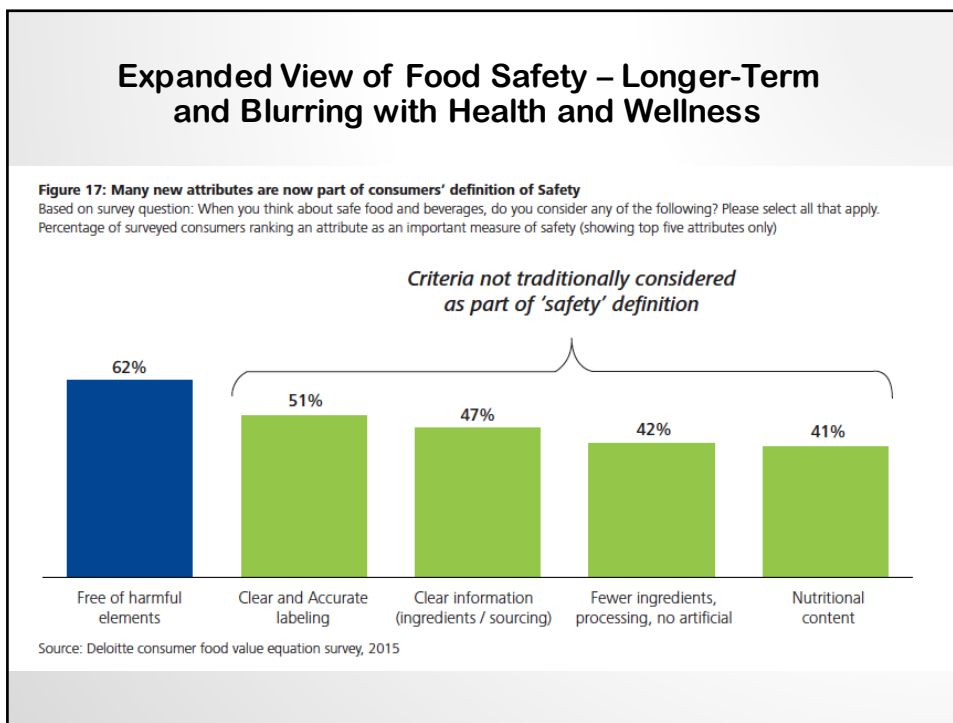

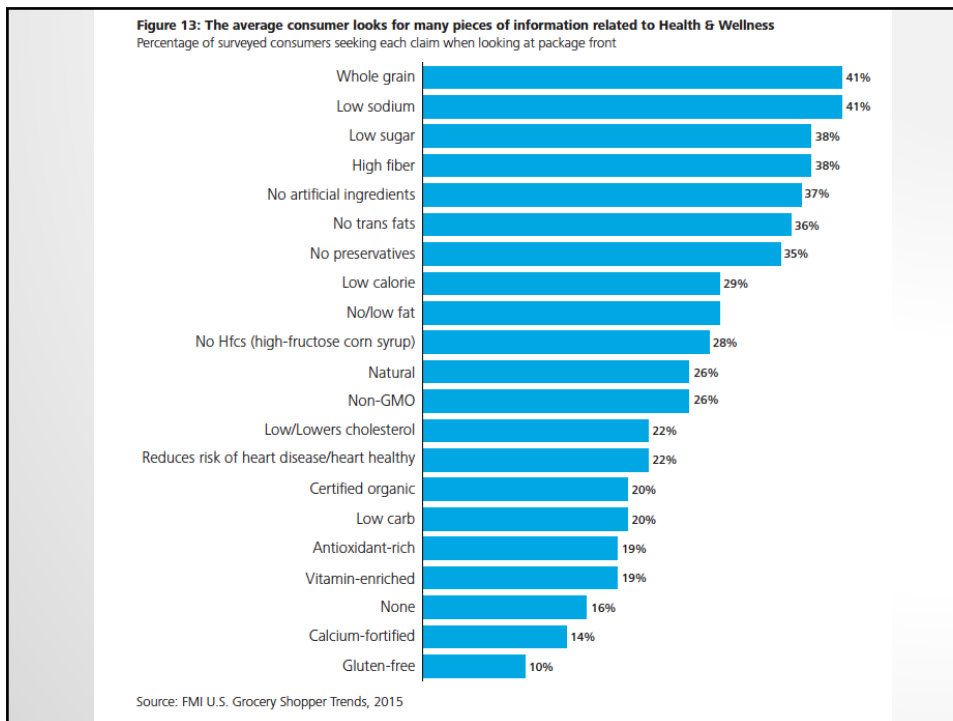

MEN (55%) vs. 48% of WOMEN
 NO COLLEGE DEGREE (56%) vs. 40% of COLLEGE GRADS
 BMI in the OBESE (60%) or OVERWEIGHT (54%) range vs. 42% low BMI
 HEART DISEASE (59%) or HIGH CHOLESTEROL (54%)
 and HIGH BLOOD PRESSURE (57%) vs. 48% NO HEALTH CONDITIONS

International Food Information Council Federation

Consumer Value Drivers

Source: Deloitte Food Value Equation Survey 2015, Deloitte Analysis

How much do you trust large, national food or beverage brands to provide food and beverages that...	Traditional drivers	Evolving drivers	% difference
Are safe in the short-term	2.16	2.41	11%
Are safe in the long-term	2.49	2.82	13%
Are clear about what's in the product, and how and where it was made	2.55	2.79	9%
Provide value for money spent	2.58	2.77	7%
Are nutritious	2.67	2.86	7%
Contribute to Health and Wellness	2.81	3.01	7%
Are produced in a socially and/or environmentally responsible way	2.83	3.06	8%

Note: Q40 How much do you trust large, national food or beverage brands to provide food and beverages that (are)...? (n=5001) (Average values shown, where: No trust = 5, Very little trust = 4, Some trust = 3, Good deal of trust = 2, Full trust = 1) Source: Deloitte Consumer Food Value Equation Survey, 2015, Weighted Respondent Dataset

Consumers who favor evolving drivers express less trust and are willing to pay more....

Willingness to Pay	Percentage
Willing to pay up to 10% more	55%
Willing to pay 10% - 20% more	23%
Willing to pay 0% more	19%
Willing to pay more than 20% more	3%

FOOD INDUSTRY CONTEXT

- The supermarket industry is a 1.5% business
- Most retailers perceive themselves as buying agents for consumers, but the definition is changing
- Food retailing is polarizing: Discounters and Differentiators
- Shifting balance of power toward consumers
- Intensifying retail competition, too much square footage
- Online shopping rising rapidly from a small base
- Supply chain visibility and traceability is improving
- Food safety concerns dominate
- Large food manufacturers losing share but reacting

- “Big” has become bad
- Traditional, large food companies losing share
- Consumers want less – simplicity, fewer ingredients and less processing – a new definition of healthiness
- Can large, established food companies provide “authentic and genuine” food experiences?

Emerging, rapidly growing “Better For You” brands are capturing market share

Yogurt Buyers Send Dannon Back to the Farm

By **STEPHANIE STROM** APRIL 26, 2016
New York Times

New Direct Supply Relationship with jointly agreed upon:

- animal welfare standards
- soil and water conservation practices
- traceability
- GMO-free feed by 2018
- price guarantees

The food retailer with the highest total sales of organic products in 2015 was?

Organic Sales in 2015: \$4 billion BMO Capital Markets

Food Retailing in the U.S.

- Trillion \$ market
- Low-No growth
- Fragmented
- Traditional formats losing share

Supermarkets as Buying Agents for Consumers, Providing:

- Choice – broad and deep assortments – 50,000+ SKUs
- Choice – multiple strata of price and quality
- Information
- Services
- Quality and safety assurance

Stimulating demand through merchandising, promotion, and services, but avoiding controversy and the debates about healthfulness, upstream production practices, etc... in favor of consumer free will.

The Buying Agent Role Of Supermarkets is Rapidly Changing

Excess square footage, stagnant growth and demand for low prices are fueling low price competition and format differentiation.

Discount formats account for approximately 40% of retail food sales...and the proportion is growing

Price transparency is not far off....

Aldi: 200+ stores per year
Dollar General: 1000+ stores per year
Lidl: 200 stores by YE 2018

2. Capturing Growth Opportunities

Significant Store Growth Opportunities

Note: Open stores as of 1/29/2016 and identified remaining opportunities as of March 10, 2016

Business | Tue Mar 22, 2016 7:44pm EDT

Wal-Mart jumps into milk processing, hits Dean Foods' stock

A new Walmart dairy facility, one of the biggest in the US, will be built in Fort Wayne, Indiana. It will create more than 200 jobs, and be operational by 2017.

The Buying Agent Role Of Supermarkets is Rapidly Changing

The balance of power in the food value chain is shifting downstream from manufacturers to retailers to consumers

Demand is exploding for healthier products that are produced in more sustainable ways

Consumers want information and transparency

Perception is reality

Retailer as Curator

- Limited Assortment formats
- Natural Specialist formats
- SKU rationalization
- Rising private label penetration
- Expanded assortments of organic, natural, simple products
- Premiumization

SimplyNature

Products made with honest ingredients that you can feel good giving to your family.

Less is more with SimplyNature.

Each SimplyNature item is created without adding over 125 artificial ingredients and preservatives.

IRI: 2016

Takeaways

- Consumer awareness, interest and concern is high and will continue to grow
- Understanding lags – consumers seek information and assistance in making healthy and sustainable food choices
- Traditional food retailers are losing share – future growth will be concentrated in the discount segment
- Retailers are curating assortments to differentiate, appeal to consumer demand and become more productive
- Retailers are providing more information while attempting to avoid bias and controversy
- Manufacturers and retailers, while steering clear of controversy, are altering policies and practices when and where consumer sentiment is “clear”
- Premiumization is an opportunity
